The LRA online Customs Tariff Portal allows access to an updated customs tariff data via an easy-to-use tool that provides customs tariff codes, classification notes, and customs duties.

The online Tariff Portal also supports the timely implementation of HS 2022, which takes effect from 1 January 2022.

This tool is possible through a collaboration between the WCO EU Programme for Harmonized System in Africa, the Liberia Revenue Authority, and Global Trade Solution GTS, a private South African-based company.

By making the Liberia Tariff available online, Liberia Revenue Authority will fulfill its commitments regarding the World Trade Organization's Trade Facilitation Agreement (WTO-TFA) and the WCO's Revised Kyoto Convention.

## Available Tools

### Customs Tariff Browse

This tool allows for a quick browse through the Customs Online Tariff by Section, Chapter, or Heading and views all the classification notes.

Look up the Customs Tariff Book by Section and Chapter and view all the legal notes.

### Customs Tariff Search

This tool allows the user to search by a particular HS Code or Tariff Code and search by a keyword.

### Customs Duty Estimator

It estimates customs duties, excise, ECOWAS levy, and goods and services tax based on country of origin and other parameters (e.g., vehicles will calculate overage). Thus, this function allows for a better estimation of your customs-related costs.

The European Union funds the eTariff tool under the PANAFRICA Programme, which links to implementing the African Continental Free Trade Area (AfCFTA).

The supports also points Africa towards a coordinated implementation and uniform application of the Harmonized System (HS) Convention of the World Customs Organization.
